Whirlpool Pedicure Spa Manual

©2014 by Salontechspa. All Rights Reserved.
Printed in USA.

Thank you for choosing salontech , the leading manufacturer well known worldwide for its innovation and design in pedicure spas. salontechspa takes pride in bringing you quality products that meet today's demand for safety and service. The **SpaJoy** Whirlpool Pedicure Spa has been designed for dependability, and to benefit all with a health conscious clientele.

**PLEASE TAKE TIME TO READ THIS MANUAL THOROUGHLY BEFORE USE.**

If you have any questions or problems with your pedicure spa, please contact our Customer Service and Technical Support at 516-932-8888, Monday thru Friday 9AM-6PM, or Email us at info@salontechspa.com

**Important Requirements**

salontech requires that you contact your local, licensed plumber and licensed electrician to install your new spa. Installation MUST be in compliance with all local and state building codes. Your Pedicure spa cannot operate efficiently or safely unless it is provided with adequate electrical power, sufficient water pressure, proper water temperature, and required drainage capabilities. Contact your local building inspector for information and local code compliance procedure that need to be followed when having your new pedicure spa installed. Subsequent inspections and approvals that may be required are the responsibility of the purchaser.

**Shipment Inspection**

Examine the components immediately upon arrival to make sure no damages have occurred to the pedicure spa and chair during the shipment. It is very important that you notify the driver on the face of the freight bill or bill lading of any damage. Failure to note damage on the bill of lading may prevent any claims you may have against the carrier. If damage is found, you MUST notify the carrier at once and request an inspection. DO NOT DISCARD THE SHIPPING CARTON. If you do, you do so at your own risk and expense.

**Precaution**

- Do not stand in the basin of the spa.
- Excessive water temperature is dangerous and should be checked before use.
- Maximum water Temperature should not exceed 150°F (65°C).
- Always enter and exit the spa slowly and carefully.
- Never bring or operate any electrical device near pedicure spa.
- The unit has a weight capacity of 250 pounds.

**Health Warning**

Individuals whose feet or legs are inflamed or have open wounds should not be allowed to use the pedicure spa at any time. The technician should advise clients to consult their physician before using the spa if there is any sign of fungal infection, swelling, fracture, or persistent pain. In some cases diabetics may experience improved circulation in their feet, but should first consult their physician prior to receiving a pedicure.

**If the client experiences any pain or discomfort, discontinue the use of the pedicure spa immediately.**

**Electrical Service**
A 110V, 60HZ, 15AMP GFCI protected ground must be used to supply power to each indivisual pedicure spa. And the main circuit breaker MUST be at 25AMP for maximum of two unit.

**Water Supply**
All plumbing connections must conform to local codes.
Water supply to the spa should be provided with adequate water pressure and water temperature.
**-Water pressure**
To fill the basin correctly up to level, Normal water pressure should be between 30 to 80 P.S.I.
**-Water temperature**
The hot water supply temperature must not exceed 140°. Adjust your hot water accordingly. For hot and cold water supply fittings and drain fittings location, see below diagram. Carefully connect the water supply line to the appropriate fittings located on the rear of the pedicure spa.

**Backflow Preventive Device**
All pedicure spas are pre-installed with Dual Back flow Preventive Device for the following state: CA, AZ, NV, OR, WA, and NE. This Device is optional, therefore yot need to order seperately. Salontech does not guarantee the quality of this device.

**Specification**
Backflow preventive device for faucet: Vacuum breaker comply with ANSI / NSF - 61 - 2000, ASMB A112.18.1 - 2000,
ASSE1014 and CSA standard - B125.98

ANSI / ASME A112.18.3M (performance requirements for backflow preventive device and systems in plumbing fixture fittings) is applicable to plumbing fixture fittings with outlets not protected by an air gap. Included in the possible range of applications are fittings with hose connected outlets, fitting with pull out spout, hand held showers, shampoo fittings and deck mounted fittings.
ASME A112.18.3M is now referenced in ASME A112.18.1M (plumbing fixture fittings) and CSA B125. Backflow preventive devices are listed to both standards with the Canadian Standard Association, IAPMO and UL.

ANSI - American National Institute. ASME - American Society of Mechanical Engineers.
CSA - Canadian Standard Association.
APMO - International Association of Plumbing and Mechanical Officials. UL - Underwriters Laboratory.

**Drain Facilities**
The pedicure spa drain must meet local plumbing codes. **Check valve for Drain (not provided) Must be installed by a licensed plumber.**

**Plumbing Connections**

## INSTALLATION SPECIFICATONS SUMMARY

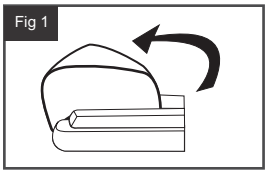
> ⚠ Warning: Failure to comply with federal, state or local codes and ordinances will result in warranty **being null and void.**

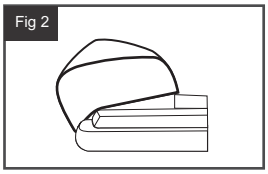
As stated, the pedicure spa installation must comply with all plumbing and electrical codes. A licensed plumber and licensed electrician must complete the applicable connections of the pedicure spa.

### Location And Support

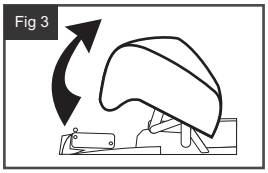
Select a level location. The floor structure beneath the pedicure spa must be capable of supporting the occupied pedicure spa. For the seat back to full recline, the pedicure spa base must be mounted 22 inches from the wall as shown below:

How to use adjustable footrest

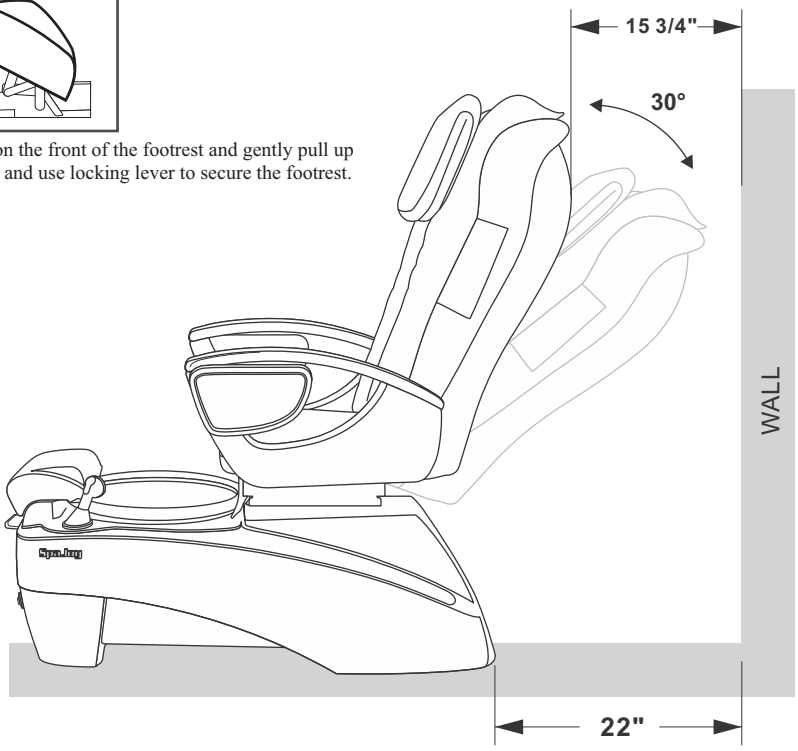




Place left hand on the back of the footrest and gently pull up toward the front as shown fig2.



Place right hand on the front of the footrest and gently pull up for desired height and use locking lever to secure the footrest.



⚠ **Minimum space from the wall**

Due to continuous improvements on all of our products, specification, characteristics, packing, color and design are subject to change without notice.

***Manufacturer requires that the pedicure spa be thoroughly cleaned at the end of the day in following manner.***

## Daily

1. Remove the jet cover(fig 1). All debris trapped on or behind the cover must be removed. The jet cover must be free of debris.
2. Before placing the jet cover, the cover must be immersed with EPA-registered disinfectant.
3. Flush out the whirlpool with low foaming detergent and warm water for 10 minutes.
4. With fresh water, EPA-registered cleanser for run the no pipe motor for 5 minutes.
5. Rinse with fresh water.

## Weekly

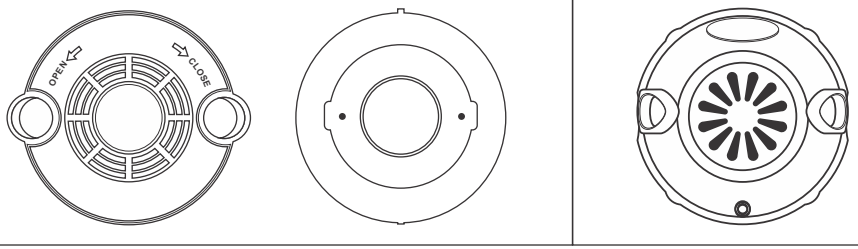
1. Fill the basin with hot water up to its level.
2. Add 3 to 4 table spoons of a low foaming agent.
3. Run whirlpool for 5 minutes.
4. Stop whirlpool and sit for 5 to 7 minutes.
5. Open air control and whirlpool for 5 minutes.
6. Drain completely.
7. Fill the basin with warm water up to its level.
8. Apply EPA-registered disinfectant according to its direction.
9. Run whirlpool for 5 minutes.
10. Drain completely.
11. Wipe out excessive water with soft cloth.
12. Repeat step 7 to 10, if necessary.

## double locking covers cleaning instruction(suggested by manufacturer)

1. Gently turn the cover counter clock-wise to remove. (Shown fig.1)
   This will expose the entire water chamber.
2 Use antibacterial soap or a solution of 3% hydrogen peroxide to wipe the inner chamber.

⚠ **Warning: DO NOT use chlorine or chlorinated products (such as diluted bleach) as this will damage the plastic, chrome cover and VOID your warranty.**

**Fig. 1** **JJT Motor Cover** **Luraco Motor Cover**



Discharge Pump Installation Instruction

1. Make a hole (size 1-3/8") for the on/off switch as shown Fig1. Pre drill required.
2. Place 1/8" clear hose into the rear of the switch and on/off switch into the hole.
3. The discharge pump kit is made to fit into the pedicure unit as shown in Fig2.
